**¡ATENCIÓN!**
Debido a las distintas longitudes de los adaptadores y a las propias dimensiones del conector del cable" que se vaya a utilizar, es posible que el montaje completo no quepa en una caja empotrable de mecanismos.

Recomendamos montar estas tomas en paredes donde haya un espacio hueco, o bien comprobar previamente la profundidad de caja necesaria."

2 Módulos, 50 – 500 W/VA
para cargas incandescentes, halógenas b.v. con trafo
convencional, o halógenas b.v. con trafo electrónico.
Puede ser amplificado mediante el dispositivo
247 EB, con cargas repartidas, o mediante el
amplificador ULZ 1215 REG, con cargas no repartidas.
Este dimmer se puede comandar desde un pulsador
convencional 531 U, o bien desde un mecanismo auxiliar
1220 NE con tecla sensora. Dispone de una segunda
entrada auxiliar, que permite manejar simultáneamente
varios de estos reguladores desde un mecanismo auxiliar
1220 NE, que hará de central. Incorpora un LED que indica
el estado de conmutación de la carga.

Este aparato sirve para amplificar la potencia de la salida de
los diferentes dimmers electrónicos de JUNG. Permite la
conexión en paralelo de varios de ellos, con lo cual ya no es
necesaria la repartición de cargas.
Véase en el capítulo de características técnicas

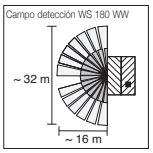
# Detectores de movimiento centralizados

| | Referencia | P.V.P. / PG |
|---|---|---|



**Principio de funcionamiento**
Los detectores reaccionan a los movimientos de calor producidos por personas, animales o cosas, y transmiten una señal a la central de detección, que conmuta la carga en consecuencia.
El montaje en sistema tiene sentido cuando se necesita cubrir un campo muy amplio. El sistema puede soportar un total de 2 x 8 sensores.

# Detectores de presencia

| | Referencia | P.V.P. / PG |
|---|---|---|

**Detector de presencia universal, 360°**
para montaje en techo, permite el accionamiento automático de la iluminación en función de la presencia y luminosidad.
Conectado a mecanismos interruptores 1201 URE, 1254 TSE y 1244 NVSE hace función combinada de detector de presencia y sensor crepuscular.
Conectado a mecanismos reguladores 1254 UDE, 1271 LED DE, 1225 SDE y 1240 STE hace función combinada de detección de presencia sensor de regulación constante de la iluminación.
Posible accionamiento auxiliar a través del mecanismo 1220 NE + tecla sensora, o a través de 1223 NE + otro detector.

para montaje en techo, sobre mecanismos 1254 UDE, 1225 SDE, 1240 STE, 1201 URE, 1201-1 URE, 1254 TSE, 1244 NVSE
Este detector enciende la iluminación si detecta movimiento, y la luminosidad ambiente está por debajo de un determinado umbral. Si se deja de detectar movimiento, o la luminosidad ambiente sube, la luz se apaga.
Si está montado sobre un mecanismo dimmer, al transcurrir el retardo al apagado irá disminuyendo el nivel de luz hasta apagarla por completo.
Posible accionamiento auxiliar a través del mecanismo 1220 NE + tecla sensora, o a través del 1223 NE + otro detector

**Características del producto**
– Regulación de luminosidad de 2 puntos
– Funciones ajustables con controles remotos IR
– Limitación del campo de detección mediante desconexión de sensores individuales o pantalla de cobertura
– Manejo con control remoto IR, estación auxiliar de 2 hilos o tecla de instalación
– Función de reprogramación para adaptar el umbral de luminosidad, en combinación - con el control remoto IR
– Advertencia previa de desconexión
– Operación de corta duración para, por ejemplo, controlar emisores acústicos de señales
– Indicación LEDs
– Simulación de presencia
– Funcionamiento como interruptor crepuscular
– Retardo a la desconexión dinámico
– Ampliación del área de detección mediante conexión en paralelo de varios dispositivos

# Estación de relés

| | Referencia | P.V.P. / PG |
|---|---|---|

**Estación de relés universal de 8 canales, 16 AX**
Dispone de 8 salidas a relés universal de potencial libre de 10 A, para conmutar cargas. Por cada salida dispone de una entrada binaria (E1 – E8) de 24 V AC/DC, 20 mA, que se puede controlar mediante el módulo sensor, o mediante cualquier pulsador convencional alimentado a 24 V AC/DC. También por cada canal existe una salida de baja tensión (A 1' -A 8'), con la que alimentar los LEDs de estado del módulo sensor.

**RS 8 REGHE** **273,15** *04*

Este nuevo modelo universal permite además configurar cada salida como pulsador o como interruptor, y también unificar dos salidas para controlar una persiana. También dispone de control para apagado o encendido centralizado.
Ver características y conexionado en el capítulo de características técnicas.
Además se le pueden conectar hasta 4 módulos sensores de 8 fases, SM 1608.

**Estación de regulación, 4 canales, 150 W**
**DIN 8 Módulos**

**UDS 4 REGHE** **447,55** *04*

**Aplicaciones**
- Accionamiento y regulación de lámparas incandescentes, halógenas 230 V, o bajo voltaje con trafo convencional o electrónico
- Combinación de las cargas mencionadas (no mezclar cargas capacitivas con inductivas)
- Manejo mediante módulos pulsadores, tanto de múltiples hilos como de bus a 2 hilos, módulos sensores o pulsadores convencionales
- Para montaje en carril DIN

**Características funcionales**
- Control local. La estación de regulación se puede manejar mediante los pulsadores de su carcasa, si no hay pulsadores externos conectados
- Dispone las salidas A1'...A4' para poder activar LEDs de estado externos.
- Protección electrónica contra cortocircuitos
- Protección electrónica contra sobretemperatura
- Función de memoria independiente para cada canal (almacena el nivel de luminosidad)
- Encendido suave para proteger la lámpara
- Apagado con función de atenuación progresiva
- Es posible aumentar la potencia de salida conectando canales en paralelo
- Posible conexión de amplificador
- Conexión especial para tarjetero de hotel
- Función de accionamiento central, todo On, todo Off
- Es posible su conexión en paralelo con otra estación, ya sea de regulación o de relés.

**Función de tarjetero de hotel**
Se puede conectar un tarjetero convencional de hotel mediante su entrada especialmente dedicada. Al insertar la tarjeta, la luz se enciende al nivel memorizado. Al extraer la tarjeta la luz permanece encendida, y se puede controlar, durante 1 minuto. Pasado este tiempo la luz empieza a atenuarse progresivamente hasta que se apaga, dentro de un tiempo de 3 minutos. La estación queda otra vez en servicio cuando se inserte nuevamente la tarjeta.

**Módulo sensor de 8 fases**
**para conectar a la estación de relés universal, RS 8 REGHE,**
**o bien a la estación de regulación UDS 4 REGHE.**
Permite controlar los 8 canales de la estación de relés o de regulación, en cualquiera de sus funciones.
Dispone de 16 campos sensores que se pueden programar libremente, sin necesidad de software.
Sus LEDs azules proporcionan realimentación, y su intensidad se puede ajustar al 50 % o al 100 %.
Se pueden conectar hasta 4 módulos sensores a una estación de relés.

**Termostato programador universal con display**
Idéntica funcionalidad y características que la versión estándar, pero con las siguientes funciones adicionales:
- Dispone de tres programas ajustables tiempo/temperatura para el funcionamiento automático.
- Admite hasta 9 acciones programadas por día
- Se puede programar cada día por separado o hacer bloques: días laborables, festivos
- Modo „Vacaciones“ con fecha de inicio y final
- Función „Optimum-Start“ (Se llega a la temperatura especificada a una determinada hora)

**Higrostato**
**con control de temperatura**
Dispone de sensores internos para medición de temperatura y de humedad ambiental. Si la humedad rebasa el umbral fijado mediante la rueda de ajuste, activa una salida con la que podremos poner en marcha un mecanismo de secado. El aparato considera también la temperatura ambiente, puesto que el aire más caliente absorbe más la humedad.
Campo de regulación: 20 % al 95 % humedad relativa
Tensión: 230 V AC, 50 Hz
Salida: 1 relé a libre potencial, de 8 A en carga resistiva

**Dimmer giratorio DALI**
**con fuente integrada para 26 componentes DALI**
Este dimmer sirve para regular el nivel de intensidad de luz en reactancias electrónicas tipo DALI.
Puede alimentar un total de 26 reactancias, ampliable a 52 instalando dos reguladores en paralelo, conectados a L y N.
Se pueden poner más reguladores DALI en paralelo para control desde varios puntos, pero conectados de forma pasiva, puesto que solamente dos de ellos pueden estar conectados a L y N.

- El aparato permite controlar manualmente luminarias equipadas con sistema DALI.
- Ajuste de la temperatura de color para iluminación DALI tipo 8,

Tunable White según IEC 62386 209
- Conexión en paralelo de hasta 4 controladores "activos" DALI con posibilidad de alimentar hasta 104 dispositivos DALI
- En modo activo suministra la corriente de control para máx. 26 dispositivos DALI.

**Dimmer giratorio DALI**
**con fuente integrada para 26 componentes DALI**
Este dimmer sirve para regular el nivel de intensidad de luz en reactancias electrónicas tipo DALI.
Puede alimentar un total de 26 reactancias, ampliable a 52 instalando dos reguladores en paralelo, conectados a L y N.
Se pueden poner más reguladores DALI en paralelo para control desde varios puntos, pero conectados de forma pasiva, puesto que solamente dos de ellos pueden estar conectados a L y N.

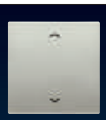
– Diseñado para actuar en conjunto con el sistema de control de persianas, eNet o KNX.
– En caso de sobrepasarse una velocidad de viento establecida, se cierra un contacto que lleva a la persiana o toldo a una posición de recogida donde quedará bloqueada hasta que cese el viento.
– Se puede seleccionar el umbral entre 8 niveles establecidos.
– Retardo a la conexión: 15 segundos. Retardo a la desconexión: 15 minutos.
Alimentación: 230 V AC, 50 Hz
Protección: IP 55
Tipo de contacto: Libre potencial
Corriente: máx. 2 A



**Sensor de lluvia** **RW 95** 363,76 *04*
Este sensor lleva incorporada una resistencia calefactora, que seca su superficie al dejar de llover. Cuando detecta lluvia se cierra su relé de salida, y se vuelve a abrir si transcurren 10 minutos seguidos en que esté seco.
Alimentación 230 V AC, 50/60 Hz
Potencia máx. 1500 W (Óhmica)

NOVEDAD

**Sensor de viento con unidad de potencia**
**132 U WS** **247,00** *04*
– Diseñado para actuar en conjunto con el sistema de control de persianas, eNet o KNX.
– En caso de sobrepasarse una velocidad de viento establecida, se cierra un contacto que lleva a la persiana o toldo a una posición de recogida donde quedará bloqueada hasta que cese el viento.
– Se puede seleccionar el umbral entre 8 niveles establecidos.
– Retardo a la conexión: 15 segundos. Retardo a la desconexión: 15 minutos.

| | |
|---|---|
| Alimentación: | 230 V AC, 50 Hz |
| Protección: | IP 55 |
| Tipo de contacto: | Libre potencial |
| Corriente: | máx. 2 A |

**Sensor de lluvia** **RW 95** **363,76** *04*
Este sensor lleva incorporada una resistencia calefactora, que seca su superficie al dejar de llover. Cuando detecta lluvia se cierra su relé de salida, y se vuelve a abrir si transcurren 10 minutos seguidos en que esté seco.

| | |
|---|---|
| Alimentación | 230 V AC, 50/60 Hz |
| Potencia | máx. 1500 W (Óhmica) |

NOVEDAD

**Sensor de viento con unidad de potencia**
**132 U WS** **247,00** *04*
– Diseñado para actuar en conjunto con el sistema de control de persianas, eNet o KNX.
– En caso de sobrepasarse una velocidad de viento establecida, se cierra un contacto que lleva a la persiana o toldo a una posición de recogida donde quedará bloqueada hasta que cese el viento.
– Se puede seleccionar el umbral entre 8 niveles establecidos.
– Retardo a la conexión: 15 segundos. Retardo a la desconexión: 15 minutos.
Alimentación: 230 V AC, 50 Hz
Protección: IP 55
Tipo de contacto: Libre potencial
Corriente: máx. 2 A

**Sensor de lluvia** **RW 95** **363,76** *04*
Este sensor lleva incorporada una resistencia calefactora, que seca su superficie al dejar de llover. Cuando detecta lluvia se cierra su relé de salida, y se vuelve a abrir si transcurren 10 minutos seguidos en que esté seco.
Alimentación 230 V AC, 50/60 Hz
Potencia máx. 1500 W (Òhmica)

**Dimmer giratorio DALI**
**con fuente integrada para 26 componentes DALI**
Este dimmer sirve para regular el nivel de intensidad de luz en reactancias electrónicas tipo DALI.
Puede alimentar un total de 26 reactancias, ampliable a 52 conectando dos reguladores en paralelo, conectados a L y N.
Se pueden conectar más reguladores DALI en paralelo para control desde varios puntos, pero conectados de forma pasiva, puesto que solamente dos de ellos pueden estar conectados a L y N.

– En caso de sobrepasarse una velocidad de viento establecida, se cierra un contacto que lleva a la persiana o toldo a una posición de recogida donde quedará bloqueada hasta que cese el viento.
– Se puede seleccionar el umbral entre 8 niveles establecidos.
– Retardo a la conexión: 15 segundos. Retardo a la desconexión: 15 minutos.

**Módulo de comunicación IP**
DIN – 2 M" **IPS 200 REG** **266,09** *16*
Este módulo de comunicación permite el acceso
al bus KNX mediante conexión IP."
Hasta 4 conexiones simultáneas."

Elementos de sistema KNX

| | Referencia | P.V.P. / PG |
|---|---|---|

**Router IP**
**con función de acoplador de línea / área**
DIN – 2 M" **IPR 200 REG** **521,47** *16*
Este dispositivo permite interconectar varias líneas
o áreas mediante una red IP, y también establecer
la comunicación entre un PC y la instalación, con
el software ETS o una visualización."
Hasta 5 conexiones simultáneas."

**Interface KNX RF**
Configuración y puesta en funcionamiento
con ETS5 o una versión más actual."
**MK 100 RF** **265,00** *06*

NOVEDAD

**Funcionalidad**
– Comunicación entre una línea KNX RF
y una línea KNX par trenzado"
– Función de repetidor en redes KNX RF.
Para ello necesita una alimentación externa,
mediante Ref: NT 2145 REG VDC"
– Montaje en caja de empotrar

**Teminales conexión**

**Medidor de energía KNX de 3 canales**
DIN – 4 M

**2103 REG ES** **281,73** *16*

Dispone de tres canales por cada uno de los cuales puede hacerse pasar un circuito eléctrico de máximo 16 A, para medir las siguientes variables. El neutro es común a los tres canales:
– Tensión
– Corriente
– Potencia activa
– Potencia reactiva
Dispone de objetos de comunicación donde presentar la suma de las potencias activa y reactiva de los tres canales, y también muestra la frecuencia.
Las mediciones se pueden enviar de forma cíclica o tras un cambio, y se pueden establecer valores umbral.
Para cada canal existen los siguientes contadores:
– 1 x contador de energía total
– 1 x contador de energía en los últimos 15 minutos
– 3 x contadores n
– 3 x contadores relativos n
Triple tarifa eléctrica integrada.

**Características técnicas**

| | |

**Funcionalidad**
- Medición y evaluación de datos meteorológicos
- Recepción de señal GPS y GLONASS
- Montaje en mástil o en fachada
- Encapsulado compacto y estanco
- Libre de mantenimiento
- Resistencia calefactora para evitar congelación y humedad, y para secar el sensor de lluvia
- Si se utiliza accesorio de montaje, es adaptable a diferentes diámetros de mástil
- Medición de velocidad del viento, dirección del viento, luminosidad en 4 fachadas, crepuscular, radiación solar, lluvia, temperatura, humedad relativa y presión atmosférica
- Cálculo de luminosidad máxima entre los cuatro sensores, sensación de confort (medida contando temperatura y humedad relativa), sensación térmica, humedad absoluta, posición del sol (medida por la hora y los datos del GPS)
- Módulo de bloqueo
- Control de cerramientos

# Smart-Control

Este compacto dispositivo KNX con pantalla táctil encaja en el diseño de los mecanismos y simplifica el manejo de su instalación mediante un uso intuitivo, parecido al de los Smart Phones. El control de las luces, persianas, temperaturas y más se realiza cómodamente desde la superficie táctil y sus teclas sensoras.

**00502-35** Acero latonado-porcelana, rácor M 10x1 y tornillo prisionero, (con dispositivo de bloqueo) — 2,04

**10502-31** Acero latonado-porcelana, roscado exterior para pantallas, rácor M 10x1 y tornillo prisionero (con dispositivo de bloqueo) — 4,56

**00564-35** De tirador acero latonado interior de resina termoestable, roscado exterior para pantallas, rácor M 10x1 y tornillo prisionero (con dispositivo de bloqueo) — 7,86

**10611-31** Arandela de acero latonado, para pantallas — 0,85

**00590-31** Zócalo recto, cuerpo en resina termoestable, interior de porcelana — 4,10

**00591-31** Zócalo inclinado, cuerpo en resina termoestable, interior de porcelana — 4,56

Termoplástico PBT,GF, embornamiento rápido, rácor M 10x1 y tornillo prisionero, (con dispositivo de bloqueo)

**00579-32** Marrón — 1,99
**00579-31** Blanco — 1,99

**10517-31** Porcelana, con suplemento (puente, rácor M 10x1). — 3,04

**10517-39** Suplemento para portalámparas para artº. 10517-31 — 0,81

**10579-32** Termoplástico PBT GF, embornamiento rápido, especial para obras — 1,14

**10559-32** Suplemento para fijación a pared, para artº 10579-32, termoplastico PBT GF — 0,64

### ROSCA MIGNON (E-14) 2A 250V

Acero latonado, rácor M 10x1 y tornillo prisionero (c/ dispositivo de bloqueo)

**00531-32** Interior en resina termoestable — 2,04

**10531-32** Roscado exterior para pantallas — 3,97

Termoplástico PBT GR, rácor M10x1 tornillo prisionero y embornamiento rápido, (con dispositivo de bloqueo).

**00588-32** Marrón — 1,74
**00588-31** Blanco — 1,74

**10613-31** Arandela acero latonado, para pantallas. — 0,87

### ROSCA GOLIAT (E-40) 16A 250V

**10562-31** Reforzado, porcelana, rácor 3/8 gas (M 16,6x1,3), con tornillo prisionero y toma tierra. — 14,66

**10563-31** Reforzado, porcelana, (Para fijación por medio de tornillos 5 mm. Ø) — 12,65

**00561-35** Latón-porcelana, rácor 3/8 gas (M 16,6x1,3), con tornillo prisionero, (con dispositivo de bloqueo). — 22,83

### PARA FLUORESCENTES (G-13) 2A 250V

Termoplástico PC.

**55566-31** Fijación por tornillos embornamiento rápido — 1,21

**55567-31** Con portacebador, fijación por tornillos embornamiento rápido — 3,44

**55509-31** Fijación rápida (espesor chapa de 0,6-2,0 mm.) embornamiento rápido — 1,04

**55510-31** Con portacebador, fijación rápida, (espesor chapa de 0,6-2,0 mm) embornamiento rápido — 1,20

**55572-31** Con soporte metálico, embornamiento rápido — 2,59

### PORTACEBADORES

**55800-31** Termoplástico PC, embornamiento rápido — 0,85

**55193-31** Termoplástico PC, embornamiento por tornillos — 2,00

### CONECTORES

**10498-31** Conector macho (radio) para cable coaxial de 75 Ω — 2,60
**10499-31** Conector hembra (TV) para cable coaxial de 75 Ω — 3,84

**10490-31** Conector macho para tomas de altavoz s/DIN 41529 — 1,13

### CLAVIJAS DE ENCHUFE 10A 250V~

**00106-31** Adaptador multivía 3 derivaciones, termoplástico, potencia máxima 2.300W 230V~. — 2,45

**00160-31** Bipolar, termoplástico — 1,44

### CLAVIJAS DE ENCHUFE 10/16A 250V~

**10431-31** Bipolar, contacto de tierra lateral Schuko, espigas de 4,8 mm Ø, termoplástico — 2,81

**10451-31** Bipolar, contacto de tierra lateral Schuko, espigas de 4,8 mm Ø, termoplástico. Salida cable lateral. — 4,75

**04132-61** Bipolar, con contacto de tierra lateral Schuko, transparente con indicador luminoso de tensión, espigas de 4,8 mm Ø — 5,43

### CLAVIJAS ENCHUFE ESPECIALES

**07068-31** Tripolar, con neutro y contacto de tierra laterales Schuko, 20A 380V~, resina termoestable — 10,69

**10437-31** Bipolar, con contacto de tierra, 25A 250V~, (Para cocinas) — 18,38

**10457-31** Bipolar, con contacto de tierra lateral Schuko, 25A 380V~, resina termoestable. — 10,66

CONDICIONES GENERALES DE VENTA:
La formalización de un pedido implica para el comprador la aceptación de las siguientes condiciones de venta:

PRECIOS:
Esta tarifa anula las anteriores.
Los precios de nuestras tarifas se refieren a los materiales o equipos cuyas características se determinan en las mismas y en su catálogo.
Los precios se entienden "EX WORK" nuestra fábrica, siendo por parte del comprador los embalajes y portes. Aparte en factura, se aplicará el I.V.A vigente.
Todos los gastos de cualquier índole, motivados por modificaciones originadas por orden del comprador, después de confirmado el pedido, serán motivo de revisión de precio. Del mismo modo, serán por cuenta del comprador los gastos de inspección o certificación por parte de Organismos Oficiales.
Los precios de algunos artículos expuestos en catálogo pueden no figurar en ésta; en tal caso, contacte con nuestro Servicio Técnico-Comercial.
Variaciones en precios y disponibilidad pueden producirse sin previo aviso.

CONDICIONES DE PAGO:
Los precios están calculados para pago a 60 días.
Los pedidos de importe inferior a 150,00.-€ netos incluirán en la factura 3,00.-€ por gastos de manipulación y se servirán contra-reembolso.
La formalización de una reclamación no da derecho al comprador a suspensión o deducción alguna en los pagos comprometidos. Todas nuestras ventas son realizadas con reserva de propiedad. En consecuencia, la cesión de la propiedad de las mercancías a nuestros clientes, queda en reserva hasta el pago íntegro de su importe, intereses y otras cargas.

GARANTIA:
IES Seguridad garantiza sus productos contra todo defecto de construcción o de material por el periodo de dos años desde la fecha de fabricación. La garantía se limita a la sustitución o reparación, a nuestro criterio, del elemento defectuoso siempre que haya sido usado de acuerdo con las especificaciones. El uso de un elemento en aplicaciones o en condiciones distintas de las definidas como propias será siempre bajo la responsabilidad del usuario, anulándose la garantía.
En periodos largos de almacenaje o inactividad, los elementos calefactores pueden adquirir humedad que disminuye transitoriamente el valor del aislamiento eléctrico, que puede recobrarse con una conexión o estufado previo. Consultar a nuestro Servicio Técnico-Comercial.

DEVOLUCIONES:
Ninguna devolución puede ser aceptada sin acuerdo escrito por nuestra parte.
El material debe sernos enviado a portes pagados previo aviso y consentimiento de nuestro Servicio Técnico-Comercial, incluyendo la tarjeta de garantía o copia de la factura.
Una vez inspeccionado por nuestro Servicio de Garantía, será reparado o sustituido si es procedente.
Los elementos manipulados, usados indebidamente o dañados mecánicamente, no serán atendidos y quedarán a disposición del cliente durante 30 días, siendo después desechados.
En caso de aceptar abonar material standard devuelto, el abono se establecerá sobre la base del 90% del valor del material facturado, excluyendo los embalajes, salvo pedido compensatorio.
La cancelación del abono resultante se llevará a efecto deduciendo su importe de nuevas compras.

RESPONSABILIDAD:
La responsabilidad total por cualquier reclamación tendrá como límite el precio del producto o servicio que ha ocasionado la reclamación. En ningún caso será responsable de consecuencia de accidentes o incidentes (accidentes a personas, daños a otros bienes, consecuencias económicas o financieras).

FUERO:
Cualquier controversia será sometida a los Jueces y Tribunales de Barcelona, con renuncia expresa a cualquier fuero.

CONCEPTO

# SIRENAS MOTORIZADAS

Dispositivos electromecánicos con una alta señal de salida producido por el aire que expulsa la hélice interior creando un sonido único y penetrante. Esta señal puede ser pulsada o modulada mediante un simple on/off. Amplio rango de corrientes. Sonido omnidireccional. Diseño robusto. Alarma de incendios... IP 54.

## SEÑALIZACIÓN DE PROCESOS TPL

Sistema modular basado en tecnología LED y diseñado para señalizar máquinas o procesos. Opción led fijo o intermitente seleccionable en el propio módulo mediante interruptor. Las conexiones de los módulos se realizan mediante sistema de resortes sin necesidad de herramientas de una forma fácil y segura.

Sistema modular enchufable. Cada módulo incorpora sus LED. Posibilidad de combinar con señalización acústica. Tamaño: 50 mm de diámetro. Cada torre se compone de los siguientes elementos: Soporte - Base - Módulos LED - Zumbador (opcional) - Tapa.

Aplicaciones: Señalización de procesos, automatizaciones industriales, maquinaria.
